

Domestic Plumbing & Heating Engineer

Role Purpose:

The post-holder will be expected to provide a comprehensive repairs and maintenance service to domestic plumbing, sanitation and heating installations, equipment and appliances in operation at client premises.

To undertake fault-finding analysis, maintenance, repairs, installation and upgrading work to heating, sanitation and plumbing systems on a planned and reactive basis to ensure that client properties can be operated safely and in compliance with appropriate regulatory standards and good practice.

Responsibilities

- Carry out installation and maintenance work to heating installations of all types in domestic buildings and be fully conversant with all aspects of the heating systems that operate at client premises.
- Carry out installation and maintenance work to plumbing, drainage and sanitation installations of all types in domestic buildings and be fully conversant with all aspects of these systems that operate at client premises.
- Undertake fault-finding, problem-solving, diagnosis and repair of performance concerns as may affect the operation and proper performance of the plumbing, drainage and heating systems.
- Carry out periodic inspection and testing of gas and oil-fired installations and appliances to include completion of relevant test and maintenance certification in accordance with the relevant industry regulations (ie: GAS SAFE; OFTEC; etc). To complete other forms of certification as may be appropriate (eg; TMVs, etc).
- Heating equipment, plant and systems to include completion of relevant test certification in accordance with all appropriate regulations. To complete other forms of regulatory certification as may be appropriate and within the remit of the post-holders relevant qualifications.
- Carry out installation and maintenance work to fuel tanks, pipelines, valves, pumps, control gear, meters and associated equipment.
- Undertake associated multi-trades duties such as minor general plastering and joinery work.
- Carry out and complete all works to a high standard, in a competent manner and to leave the site of works in a clean and tidy condition.
- Liaise with other staff and external contractors in a positive and cooperative manner and as necessary to ensure the timely and proper completion of works to support reasonable operational expectations.
- Ensure appropriate and timely completion of all paperwork, job/time sheets and certification and its recording within established archive and filing systems.
- Work with line manager and provide advice and information relating to technical matters.
