

## Renewables Engineer

### Role Purpose:

To work on ground and air source heat pumps as well as working alongside others on solar thermal, solar PV and other renewable technology.

Full training will be provided on specific renewables and may include working on a variety of equipment, such as:

- Air Source
- Ground source
- Biomass
- MVHR
- Solar thermal
- Solar PV
- Battery Storage
- Domestic
- Commercial

Must be able to work independently but also able to work as part of a team. The post requires some hard physical work outdoors from time to time.

Full training will be given to bring the employee up to the necessary level and to progress within the industry.
